(54) CONTROLLER FOR BACKLIGHT OF LIQUID CRYSTAL DISPLAY PANEL

(57)Abstract:

PURPOSE: To make handling extremely convenient by automatically restoring the set time to the original time after the set time lapses without any operation when the auto-off time is changed.

CONSTITUTION: When a backlight 23b is turned on, a backlight timer 22b incorporated in a CPU 22 is set at 10min, and the light is automatically turned off after 10min. When the auto-off is desired to be prolonged, a specified key is operated, and the backlight timer 22b is set at 60min. The backlight 23b is turned off after 60min, and placed on standby by the backlight-on requirement. When the backlight ON is required, the timer 23b is set at 10min, and then automatically restored to the auto-off. Thus, the operation is made extremely easy and convenient.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's
decision of rejection]

[Date of requesting appeal against
examiner's decision of rejection]

[Date of extinction of right]
